Coffee Table 1000x850mm (MILLCT)

Millwood Outdoor Furniture is made from Australian Cypress, a beautiful timber, renowned for its rich honey coloured grain.

Features include:

- Durability - Australian Cypress is rated as Class One durability (the highest possible) making it highly weather tolerant and well suited to the outdoors.
- White Ant resistance - one of the few timbers in the world that is naturally white ant resistant without needing to be treated with toxic chemicals
- Minimal shrinkage - Although Australian Cypress will like all timbers expand and contract according to the moisture content of its environment the natural shrinkage factor is very low
- Made from trees grown in sustainably managed forests, under strict government controls
- Sturdy construction - all Millwood Outdoor Furniture is constructed in Australia to the very highest standards using only quality timber and parts.

NATURAL SHRINKAGE & EXPANSION

Timber continually takes up and gives off moisture to keep in balance with its surroundings. This results in a process of natural shrinkage and expansion. Australian Cypress has one of the lowest shrinkage rates of any timber at a mere 2.5% ensuring your furniture is extremely stable.

SUSTAINABLE HARVEST

The Australian Cypress used in Millwood Outdoor Furniture is milled from timber grown in sustainably managed natural forests in NSW, based upon a natural cycle of growth and re-growth. Strict controls ensure that only selected trees are milled leaving the forest environment to maintain a safe haven for flora and fauna.

CARE & MAINTENANCE

Millwood Outdoor Furniture is highly durable and well suited to outdoor environments. To maintain your setting, a simple application of a light furniture oil once or twice a year is all that is needed.
